Creating a new React app in C:\Users\Anand\mailregisterapp.

Installing packages. This might take a couple of minutes.
Installing react, react-dom, and react-scripts with cra-template...

(node:30844) ExperimentalWarning: Support for loading ES Module in require() is an experimental feature and might change at any time
(Use 'node --trace-warnings ...' to show where the warning was created)

added 1323 packages in 2m

269 packages are looking for funding
  run 'npm fund' for details

Installing template dependencies using npm...
(node:15880) ExperimentalWarning: Support for loading ES Module in require() is an experimental feature and might change at any time
(Use 'node --trace-warnings ...' to show where the warning was created)

added 17 packages, and changed 1 package in 10s

269 packages are looking for funding
  run 'npm fund' for details
Removing template package using npm...

(node:30240) ExperimentalWarning: Support for loading ES Module in require() is an experimental feature and might change at any time
(Use 'node --trace-warnings ...' to show where the warning was created)

removed 1 package, and audited 1340 packages in 4s

269 packages are looking for funding
```

```
Windows PowerShell X + v

Removes this tool and copies build dependencies, configuration files
and scripts into the app directory. If you do this, you can't go back!

We suggest that you begin by typing:

  cd mailregisterapp
  npm start

Happy hacking!

C:\Users\Anand>cd mailregisterapp
C:\Users\Anand\mailregisterapp>code .
C:\Users\Anand\mailregisterapp>npm start

> mailregisterapp@0.1.0 start
> react-scripts start

(node:30992) [DEP_WEBPACK_DEV_SERVER_ON_AFTER_SETUP_MIDDLEWARE] DeprecationWarning: 'onAfterSetupMiddleware' option is deprecated. Please use the 'setupMiddlewares' option.
(Use 'node --trace-deprecation ...' to show where the warning was created)
(node:30992) [DEP_WEBPACK_DEV_SERVER_ON_BEFORE_SETUP_MIDDLEWARE] DeprecationWarning: 'onBeforeSetupMiddleware' option is deprecated. Please use the 'setupMiddlewares' option.
Starting the development server...
Compiled successfully!

You can now view mailregisterapp in the browser.

Local:      http://localhost:3000
On Your Network: http://192.168.1.12:3000

Note that the development build is not optimized.
To create a production build, use npm run build.

webpack compiled successfully
